Forestry establishment (continued)

nomic impact." Not only is Keith sold on the accuracy of the C-Dax tree release sprayers but he also believes that because the accumulator pump delivers more pressure for less pumping, spraying crews are fresher and happier at the end of a day's spraying.

Whilst the accumulator pump plays a major role in the success of C-Dax tree release sprayers, other factors such as the electronically-controlled trigger dispenser and the fact that it switches easily from metered dose to manual operation all contribute to C-Dax tree release sprayers being considerably more cost-effective than most alternatives.

Fire Extinguisher

The third piece of equipment that makes up the C-Dax forestry establishment package is the knapsack fire extinguisher. Whilst it is not always mandatory during the off-season, most forestry companies have minimum requirements for the instant availability of water.

The C-Dax fire extinguisher meets these requirements and delivers an instant fire-fighting capability via its double-acting pump action system. Forestry establishment is certainly a growth industry and with the planting season almost here those contractors who opt for a specialised fully integrated system will certainly be well set up to deliver major benefits to themselves, the forest owner and employees alike.

Get more hectares per man per day

BULK CHEMICAL STORAGE TANKS

- Built-in agitator pump eliminates settling out
- Premix to provide accurate chemical ratios
- Flatdeck or trailed options keep pace with your gang for maximum productivity

TREE RELEASE SPRAYERS

- Accurate metered dose from 5ml to 70ml
- Switches easily from metered dose to manual operation
- Costs less per sprayed hectare than most alternatives

KNAPSACK FIRE EXTINGUISHERS - YOUR FIRST LINE OF DEFENCE
